The double listing

Archive row number beside bibliography number

is the row number in the archive's `index.html`, which numbers only the items held, in year order. **Bib #** is the number printed in `ScottBibliography.pdf`, draft of Sunday, March 15, 2026, which numbers books a–d and papers 1–99 over the whole corpus, held or not. Δ is Bib # minus #.

The two sequences are different keys. They agree on 13 of 79 numbered rows, first diverging at row 8 (= bibliography 6), where the archive inserts the 1958 dissertation that the bibliography does not number; Δ runs -5 to $+17$, widening as the 17 papers not yet held drop out. An *italic roman* Bib # marks a held item the bibliography does not number. The 17 numbers absent from the Bib # column are the papers not held; they are listed in full in the third table.

ScottBibliography.md reproduces the printed bibliography exactly: 99 of 99 paper titles agree at the same number, books a–d agree, and neither side has a gap or a duplicate.

Book-length items

#	Bib #	Δ	Year	Authors	Title
b1	9	—	1959		Dimension in Elementary Euclidean Geometry (in *The Axiomatic Method*)
b2	b	—	1980		Gierz, Hofmann, Keimel, Lawson, Mislove & Scott, *A Compendium of Continuous Lattices* (Springer)
b3	62	—	1982		Domains for Denotational Semantics (ICALP 82, LNCS 140)
b4	63	—	1982		Lectures on a Mathematical Theory of Computation (in *Theoretical Foundations of Programming Methodology*)
b5	c	—	2003		Gierz, Hofmann, Keimel, Lawson, Mislove & Scott, *Continuous Lattices and Domains* (CUP) — front matter only

25	26	+1	1968	Scott	Extending the topological interpretation to intuitionistic analysis
26	27	+1	1969	Scott	Boolean models and nonstandard analysis
27	28	+1	1969	Scott	On completing ordered fields
28	30	+2	1970	Scott	Advice on modal logic
29	29	+0	1970	Scott	Constructive validity
30	32	+2	1970	Scott	Extending the topological interpretation to intuitionistic analysis, II
31	33	+2	1970	Scott	Outline of a mathematical theory of computation (Oxford PRG-2)
32	36	+4	1971	Myhill & Scott	Ordinal definability
33	*ii*	—	1971	Scott	Continuous lattices (Oxford PRG-7)
34	37	+3	1971	Scott	On engendering an illusion of understanding
35	35	+0	1971	Scott	The lattice of flow diagrams
36	38	+2	1971	Scott & Strachey	Toward a mathematical semantics for computer languages
37	40	+3	1972	Scott	Continuous lattices
38	41	+3	1972	Scott	Mathematical concepts in programming language semantics
39	34	−5	1972	Scott	Semantical archaeology: a parable (1972 Reidel reprint)
40	44	+4	1973	Scott	Models for various type-free calculi
41	45	+4	1974	Scott	Axiomatizing set theory
42	51	+9	1974	Scott	Does many-valued logic have any use?
43	49	+6	1975	Scott	Combinators and classes
44	50	+6	1975	Scott	Some philosophical issues concerning theories of combinators
45	52	+7	1976	Scott	Data types as lattices
46	53	+7	1977	Scott	Logic and programming languages (Turing Award lecture)
47	58	+11	1979	Fourman & Scott	Sheaves and logic
48	57	+9	1979	Scott	Identity and existence in intuitionistic logic
49	59	+10	1980	Scott	Lambda calculus: some models, some philosophy
50	60	+10	1980	Scott	Relating theories of the lambda-calculus
51	*iii*	—	1980	Scott	The presheaf model for set theory (unpublished notes)
52	*iv*	—	1981	Scott	Lectures on a mathematical theory of computation (Oxford PRG-19)
53	61	+8	1982	Scott	Some ordered sets in computer science
54	67	+13	1985	Scott, McCarty & Horty	Bibliography (in *Model-Theoretic Logics*)
55	66	+11	1985	Scott & Scherlis	Semantically based programming tools (summary)
56	71	+15	1990	Gunter & Scott	Semantic domains and denotational semantics
57	74	+17	1991	Scott	Exploration with Mathematica
58	75	+17	1991	Scott	Will logicians be replaced by machines?
59	76	+17	1992	Freyd, Mulry, Rosolini & Scott	Extensional PERs
60	77	+17	1993	Scott	A type-theoretical alternative to ISWIM, CUCH, OWHY
61	65	+4	1993	Scherlis & Scott	First steps towards inferential programming (1993 Kluwer reprint)
62	78	+16	1996	Scott	Symbolic computation and teaching
63	80	+17	1998	Birkedal, Carboni, Rosolini & Scott	Type theory via exact categories
64	*v*	—	1998	Scott	A new category? Domains, spaces and equivalence relations (manuscript)
65	79	+14	1998	Scott	Effective versions of equilogical spaces
66	81	+15	2000	Scott	Some reflections on Strachey and his work
67	82	+15	2002	Awodey, Birkedal & Scott	Local realizability toposes and a modal logic for computability
68	*vi*	—	2003	Scott	Review: *Tarski and the Vienna Circle*
69	83	+14	2004	Bauer, Birkedal & Scott	Equilogical spaces
70	84	+14	2006	Scott	Foreword to *The Seventeen Provers of the World*
71	85	+14	2007	Scott	The algebraic interpretation of quantifiers: intuitionistic and classical
72	86	+14	2008	Scott & McCarty	Reconsidering ordered pairs
73	d	—	2013	Univalent Foundations Program	Homotopy type theory: univalent foundations of mathematics
